

# Irish Seed Savers

*Protecting Ireland's food crop heritage for future generations*

## Seed production for experienced vegetable growers

*A four-part training. Demonstrating the essential theory and practices of seed production through the seasons, at Irish Seed Savers dedicated facility.*

*Includes planning, crop supports, selection criteria for annual and biennial seed crops; harvesting, drying, threshing, cleaning and storing.*

*The course also encourages and supports the practical experience of seed production on your own farm or market garden, and provides the necessary training to become a seed grower for Irish Seed Savers Association.*
