Triodos @ Bank Development Programme for England, which is jointly funded by Defra and the European Union. SMITHSGORE

13.00 – 14.30 Lunch

14.30 - 16.00WORKSHOPS 2

The debating is at an end and the process of launching schemes and inviting applications is underway. This session will explore what is being implemented and see clarification of open questions.

Trevor Mansfield (Soil Association) Chair

John Page (Defra): Overview of CAP and RDP implementation plans in England

Matt Heaton (Natural England): NELMS organic options

Nic Lampkin (ORC): RDP and organic support in Wales

16.00 – 16.30 Refreshment break

16.30 – 17.00 Plenary

Prof. Pablo Tittonell (Wageningen University): Agroecological solutions for future farming (title TBC)

17.00 Delegates at leisure

18.00 Poster session/bar open

19.30 Conference dinner, bar and maybe entertainment...

This project has been supported through the Rural Development Programme for England, which is jointly funded by Defra and the European Union.

THURSDAY 27th NOVEMBER 2014 Practical research and innovation

The second day has a specific focus on current research and innovation activities, with the aim of bringing producers, researchers, advisers and students together to make change happen!

08.30 - 09.00 Registration

09.00 – 10.30 WORKSHOPS 3

Postgraduate research in organic farming (Organised by SRUC)

This session provides an opportunity for current research students (MSc and PhD) and others interested in research to come along and discuss the challenges of doing research within the context of organic systems. We will also

discuss the potential for developing a UK wide network of organic research students.

Robin Walker (SRUC): Chair

Laurence Smith (ORC): Modelling the effects of a large scale conversion to organic farming in England and Wales Federico Filippi (Coventry University): Permaculture arable systems

Muhammad (Coventry University): The social dimension of sustainability in organic food supply chains Stephen Meredith (IFOAM EU): Leading discussion on networking

Conversion planning and organic farm management (Organised by IOTA)

Workshop for advisers, Control Bodies and converting farmers. 30 years of organic conversion planning in the UK! With the likelihood of conversion/business planning being a requirement for participation in organic support

schemes in future, how can we use that experience to make these plans worth doing?

Mark Measures (IOTA): Chair

Ed Goff (Hindford Grange), Stephen Briggs (Abacus Organic Associates), Nic Lampkin (ORC), Iain Tolhurst (Tolhurst Organic): Experiences and needs of conversion and management planning (panel).

Discussion: what conversion and management planning services should be provided in the future

Dairy research and innovation: breeding choice (Organised by NEFG)

Overall aim of deconstructing the choices that are open to the farmer and explaining how genomic breeding is particularly relevant. Using input from Low input Breeds and Sustainable Organic Low-input Dairying (SOLID) projects.

Gillian Butler (NEFG): Chair

Conrad Ferris (AFBI): SOLID - Cross breeding research

Gillian Butler (NEFG): LowInputBreeds: Opportunities from genomic breeding

Gordon Tweddle (Acorn Dairy): Cross breeding that works: what and why

Make legumes do the leg work (Organised by ORC)

Legumes are extremely versatile and valuable components of sustainable farming systems. Current research and best practices for fully utilising legumes on the farm will be presented and discussed by researchers and farmers. **Henry Creissen** (ORC): **Chair**

Hannah Jones (Reading Uni): Legumes leys: improving fertility building, forage quality and biodiversity John Newman (Abbey Home Farm): Fertility building ley field labs: A farmers perspective

Christine Watson (SRUC): Legumes in European agriculture: Insights from the Legume Futures project.

Mary Langman memorial workshop on Organic food quality and health

Recent research has once again opened the question of whether organic food quality is better than non-organic, but what difference does this make to health (what is health?) and how do the food and other choices made by organic consumers also influence health?

Lawrence Woodward (ORC): Chair

Peter Melchett (Soil Association): Organic farming and growing impacts on food quality – the Newcastle study Anja Vieweger (ORC): Health concepts in food and farming

TBC An international perspective

10.30 – 11.00 TEA/COFFEE BREAK

Triodos 🐼 Bank

This project has been supported through the Rural Development Programme for England, which is jointly funded by Defra and the European Union.

11.00 – 12.30 WORKSHOPS 4

On-farm trials: Learning from the horticultural field labs (Organised by OGA)

In this session we will reflect on the lessons learnt from the growers field lab trials and provide growers and researchers a chance to share experiences of conducting small-scale trials. What has worked well and what hasn't?

Phil Sumption (ORC/OGA): Chair Ben Raskin (Soil Association): Field labs - running effective DIY trials and sharing best practice lain Tolhurst (Tolhurst Organic Produce): A grower's perspective of running on-farm trials Anja Vieweger (ORC): A researcher's perspective of running on-farm trials

Organic business management - tools and approaches (Organised by IOTA)

Workshop for advisers, farmers and researchers. How to improve the sustainability of your farm. This workshop will explain what sustainability really means, look at some useful farm assessment tools and identify some practical actions on farm.

Mark Measures (IOTA): Chair

William Waterfield (Waterfield & White/Farm Consultancy Group): Assessing farm sustainability Bill Grayson: Farmer experience of using sustainability assessment to develop their farm Practical steps to improve farm sustainability – two examples:

Energy and emissions. Facilitator Laurence Smith (ORC)
 Nutrient management. Facilitator Richard Harding

Improving the nutrition, health and welfare of organic pigs and poultry

This session will bring together researchers from a number of pig and poultry research projects to discuss findings with a view to how these can inform best practice.

Jason Gittins (ADAS): 100% Organic Diet Mixes for Monogastrics – Impacts on UK Production Speaker tbc (FAI/ORC): Pig Nutrition: Investigating forage feeding with alternative sources of protein Gillian Butler (NEFG):

Diverse legumes and grass mixtures for forage production and grazing (Organised by NEFG)

The main aim is to explore opportunities that including a wider variety of legumes and grasses can bring to dairy producers.

Tim Downes (Shropshire farmer): Chair

Rob Richmond (Manor Farm, Glos): Long-grass grazing with a diverse mixture on hungry land Konstantinos Zaralis (ORC): Review of research on legumes and grasses for forage and grazing (Leg-Link /SOLID). Angus Gaudie (dairy farmer): My new experience - measuring what cows are grazing and seeing things differently

12.30 - 13.30 LUNCH

13.30 – 15.00 CLOSING PLENARY

Farmer groups leading innovation and research (Organised by ORC/Soil Association)

Innovation Clubs and Operational Groups allow producers to take control of improving their own businesses. This session will set out the opportunities and provide inspiration from those that have already done it.

Bruce Pearce (ORC): Chair

Victor Leforestier (BASE, France): Experiences of BASE as an operational group – lessons learned Marc Duponcel (DG Agri): EIP/Operational Groups. What we expect and want?

Helen Browning (Soil Association/Eastbrook Farm): Experiences of field labs as operational groups – lessons learned

15.00 – 15.30 REFRESHMENTS and CLOSE OF CONFERENCE

Triodos 🔁 Bank

This project has been supported through the Rural Development Programme for England, which is jointly funded by Defra and the European Union.
