VETERINARY MEDICINES

Routine veterinary inputs are not permitted – treatment can only be administered where the animal shows signs of illness.

The use of veterinary products requires justification to be available to the IOA at inspection time.

Justification can be:

- Vets letter
- Faecal Analysis
- Blood Analysis
- Soil Analysis

Withdrawal periods must be doubled in organics.

Organophosphate dips **are not allowed** in organics, products that can be used instead are:

- Click
- Clickzin
- Ectofly pour-on (cypermethrin)
- Cyperguard (Cypermethrin)
- Vector (Cypermethrin)

The use of hormones **is not allowed** in organics. There may be rare exceptions for individual animals and you must ensure you contact the Irish Organic Association before using any hormone treatments.

Ivermectin based products should be avoided, all other means of veterinary intervention should be exhausted before ivermectin based product can be used.

Number of treatments permitted without an animal losing it's organic status:

- Animals for meat consumption – 1 course of treatment in a 12 month period
- Animals for breeding – 2 courses of treatment in a 12 month period
- Dairy mastitis control – 2 courses of treatment in a 12 month period
- *A course of treatment means all necessary measures to restore the animal to full health following a particular disease*
