

Dear Sir or Madam,

I am writing to you to as I believe there is an opportunity for you to include White's Oats as a customer when developing your plans with regard to organic farming.

White's Oats have been milling oats in Tandragee, Co. Armagh for 180 years and have plans to further develop our milling capabilities in the coming years. White's is wholly owned by local farmer's co-operative Fane Valley Co-operative Society Ltd.

Over a period of twenty years White's has been instrumental in developing the success of the organic oats category and it is now the largest organic oat miller in the UK and Ireland.

We are committed to the organic sector and have developed an enviable supply chain model which delivers mutually beneficial and transparent contracts including significant investment in R&D which will help ensure the long term viability of the market.

White's have invested over £100,000 in oat R&D and agronomy support over the past 4 years

Over the past few years we have developed strong relationships with our organic growers who in turn have committed to supplying their organic oats on an annually contracted basis. With this experience I believe that the team at White's can help you as you develop your organic business.

If you are currently an organic grower and or in-conversion and require a market for organic milling oats (and perhaps some advice that may help you on the way), I would love to hear from you to discuss a potential future supply contracts.

Please feel free to get in touch.

Regards

Sean Kane
